- Riveting technology
- Thread technology
- Decoupling
- Tolerance compensation
- Quick release
- Components & moulded parts
- DIN and standard parts
- Custom-made parts
- Screw locks
- Assembly systems

Innovative Solutions

In the World of Joining Together we can look at your individual needs and show you practical demonstrations of what we can offer.

You can find out about anything from efficient C-part management and innovative fasteners to economical processing machines.

Practical Application

We use practical examples to show how we can support you in the area of application technology and e-commerce.

Constructive dialogue with our staff also generates new ideas and initiatives for your business.

Efficient Processing

To make an optimal connection it is important to choose a suitable fastener, but you also need the right processing system.
